

Shelf Life Monitoring Solution

Build a brand on quality and freshness to increase customer loyalty and sales

iFoodDS Shelf Life Monitoring Solution is a quality and freshness monitoring app that enables inspectors to capture the deterioration of produce items. Compare your data against the shelf life anticipated by suppliers to see if produce holds up as expected. Our solution helps monitor decline over time and provides insights into issues that can be brought to the attention of suppliers. This makes it easy to improve delivered freshness by guiding sourcing and buying decisions.

Access real-time reports and dashboards

Analyze data and trends to inform buying decisions

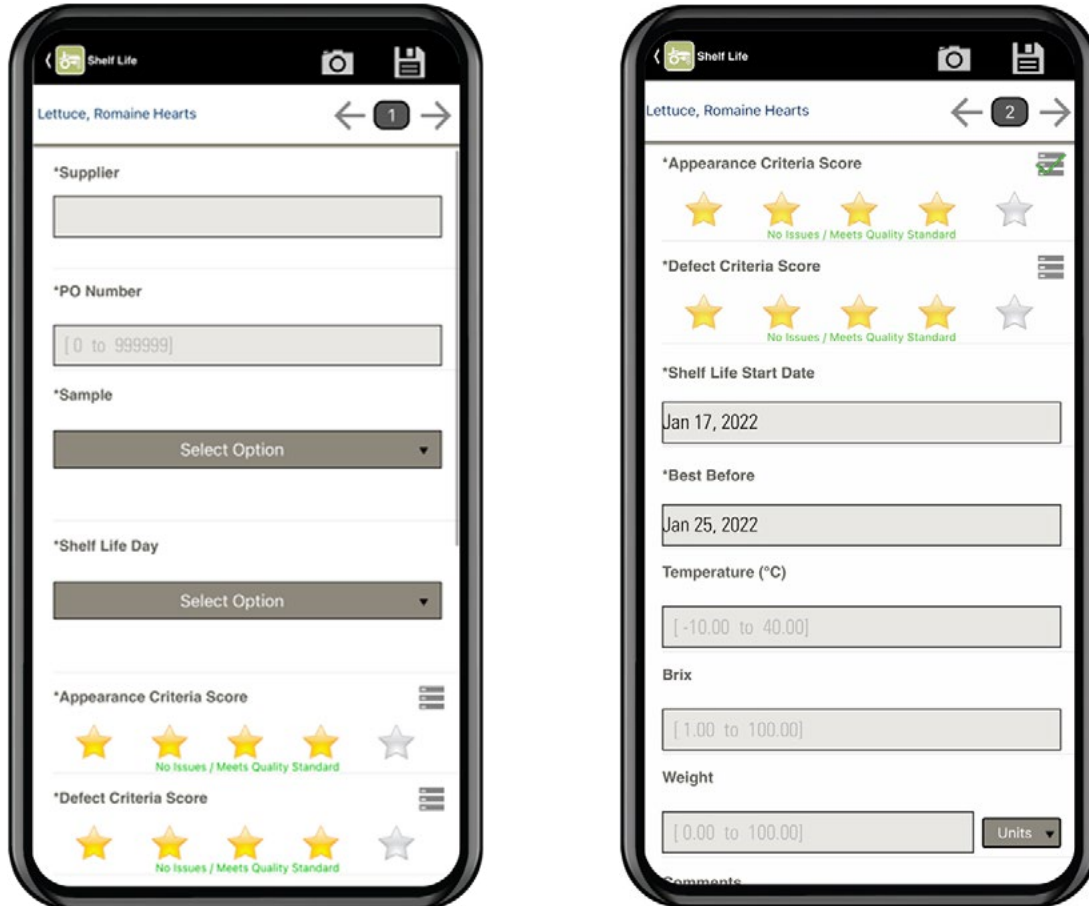

Configure to quality workflows and inspection requirements

Gain insights from data trends to guide sourcing decisions

- Compare suppliers, locations and other factors to identify where shelf life issues are originating.
- Send automatic notifications to suppliers with vital insights from your shelf life inspections.
- Establish standardized shelf life audits across all facilities with our easy-to-use app-based solution.

Reduce in-store waste and improve customer satisfaction, loyalty and sales

- Record the progression of product deterioration up until the end of the anticipated shelf life.
- Access real-time reports that help you make data-driven decisions to improve delivered freshness.
- Easily integrate Shelf Life into your quality workflow.

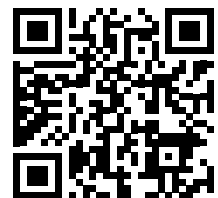

iFoodDS offers connected Food Safety, Quality, and Traceability solutions that make it easier to deliver wholesome, fresh, high-quality produce to consumers. With iFoodDS, you'll have the tools you need to provide full transparency, collect real-time customer feedback, bolster your reputation and create preference for your brand.
