Supply Chain Traceability

iFoodDS®
HarvestMark

Total Supply Chain Traceability. Real-Time Visibility.

Protect your reputation and create preference for your brand with iFoodDS | HarvestMark. In today's complex supply chain, you need to do more than simple one-up, one-back, lot-level traceability. Our software solution provides comprehensive food traceability that lets traceback or traceforward across the entire supply chain and get real-time visibility with cloud-based technology.

Easy to deploy, easy to use and affordable, our platform delivers case and pallet traceability and labeling. We go beyond PTI standards to give you and your trading partners full compliance and transparency to enhance your company's value across the supply chain. For 15 years we've been the proven provider of traceability solutions worldwide, enabling traces on billions of products each year.

**Identify larger trends with comprehensive reporting and analytics**

Minimize time spent on audits and recalls with instant traceback traceforward

Cloud-based technology keeps your data secure and accessible

Supports all harvesting, packing and processing workflows

Exceed PTI Standards and Customer Requirements with Case Level Traceability

- Traceback across the supply chain, instantly.

- Manage GTINs and label formats across multiple locations.

- Track harvest and production data that is important to your business.

Traceforward Instantly with Pallet Level Traceability

- Streamline Advance Ship Notices (ASN) & pallet shipping processes.

- Comply with the requirements of your customers via our easy to use ASN add-on solution.

- Integrate with your quality control (QC) processes to improve the transparency of outgoing shipping and receiving inspections.

- Use in a warehouse environment on your mobile device.

- Instantly traceback from a purchase order or shipment to the specific GTIN's, Lot's and pack or harvest dates.

Cost Effective, Easy to Deploy and Flexible

- Save time with our optional integration capabilities.

- Save money with straightforward pricing for operations of any size.

- Align our solution with user roles and workflows through mobile, web and desktop apps.

- Identify larger trends with a single, robust dashboard allows for efficient navigation of traceability data across the entire supply chain.
