

# Food Safety Manager for the Field

iFoodDS®

## Mitigate Food Safety Risks with our Comprehensive Software Solution.

Move away from cumbersome paper and inefficient processes that don't give you the visibility you need into your food safety inspection data. With iFoodDS, you'll gain the tools you need to implement robust, transparent, real-time process controls across operations of any size. This helps you keep safety top of mind throughout your organization and across multiple locations. Gain the time and tools to become proactive, so you can focus on acquiring and retaining customers who increasingly demand more transparency.

Our food safety software will help automate your processes, from pre-season to harvest, including managing inspection logs, environmental assessments and corrective actions. Gain real-time insights into environmental hazards, from flooding to animal intrusion. And with field-level digital data capture, you can save time and always be audit-ready.

Receive personalized, expert-level service

Reduce paper and gain real-time visibility across all growing locations

Build and improve your operation's food safety culture

## Standardize and Gain Real-Time Visibility into Your Food Safety Program and Implement Best Practices Across All Your Growing Locations

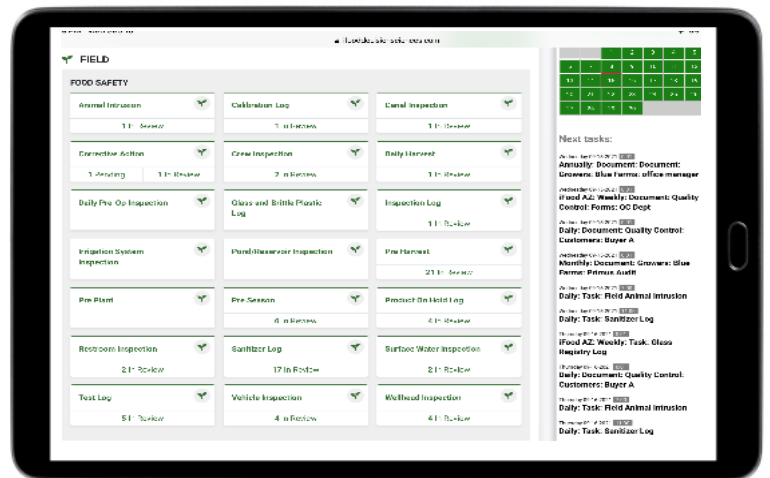

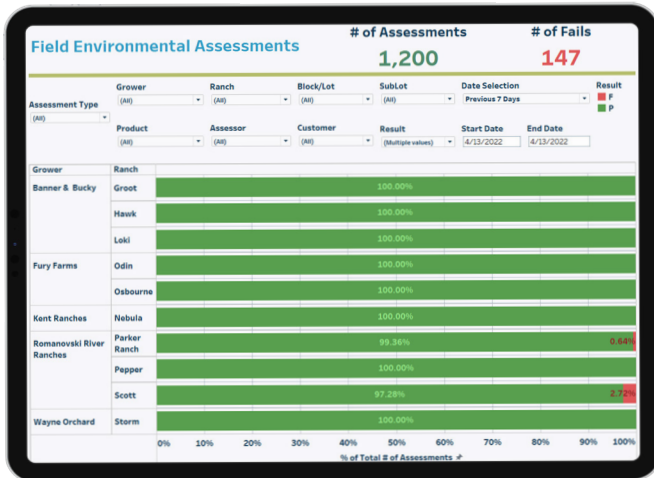

- Implement robust, transparent, real-time process controls.
- Proactively assess and manage risks.
- Simplify and streamline audit prep with organized online documentation.
- Utilize tools that can help you confidently meet FSMA requirements, such as automated forms, checklists and logs.
- Gain access to comprehensive logs and risk assessments for pre-season, daily pre-plant, and pre-harvest.

## Facilitate Ease in Accessibility Across Your Operation for Document Retrieval Anywhere There Is Connectivity

- Receive access to a cloud-based document management platform to easily store, access and maintain all supplier documentation (i.e., SOPs, COAs, ranch maps, etc.).
- Ensure single point of truth for the organization's FSQA program(s).
- Utilize permission-based access to safeguard document integrity.

## And More

- Identify recurring issues and trends with comprehensive reports and dashboards.
- Receive personalized, expert-level service and support for seamless onboarding, training, and system maintenance.
- Available in both English and Spanish.
- Supplier Management solution available as an add-on option.

“

iFoodDS has emerged as the leading provider of food safety, traceability, and quality software for the supply chain due to their innovative product lines and technological and scientific expertise. The company is positioned to continue its evolution as a product innovator and solution provider as well as a thought leader for both its customers and the broader produce industry. - Vic Smith, CEO of JV Smith Companies

”

iFoodDS offers connected Food Safety, Quality, and Traceability solutions that provide the tools you need to transform your safety and quality processes and gain real-time visibility across your operations.
