iFoodDS®

Trace Exchange™ Solution for Enterprises

with IBM Food Trust™

Achieve FSMA 204 compliance and gain a complete picture of your supply chain, allowing you to instantly traceback and traceforward

Protect your brand and increase transparency across your supply chain with the iFoodDS' Trace Exchange™ (with IBM Food Trust™) solution. We help retailers, distribution centers, processors and restaurant chains connect traceability with their supply chain data and supplier documentation. This data empowers you to surpass regulatory compliance and achieve a competitive advantage. Our solution provides a complete picture of your extensive supplier network, allowing instant traceback and traceforward across your supply chain.

Our online dashboards let you view connected traceability and supply chain data in one place. Easily identify trends, proactively manage supplier compliance, and reduce the impact of a recall with a quick and efficient response that enables you to keep shelves stocked.

- Purpose-built FSMA 204 data capture applications & methods
- Supports GS1 standards for interoperability
- Access to a global network of supply chain partners
- Industry-leading network traceability dashboards
- Unmatched onboarding experience for you and your supplier network

The iFoodDS Trace Exchange™ solution includes secure, scalable data storage and sharing, and is the only traceability platform proven to enable FSMA 204 compliance and support the needs of the industry's largest enterprises. We provide robust program management, technical and communications support, and onboarding services to help your suppliers quickly and efficiently comply with your requirements, as well as FSMA Rule 204.

As a partner that goes beyond compliance, we enable customers to achieve market and operational advantages over their competitors.
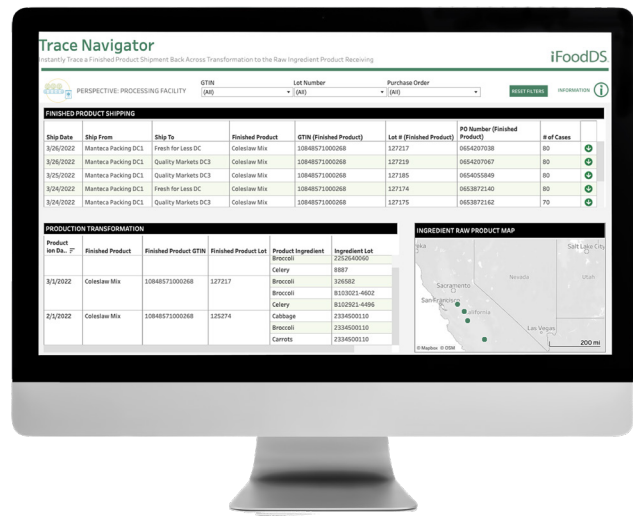

FSMA 204 compliance you can trust

- Leverage purpose-built FSMA 204 data capture applications & methods to easily capture all required KDEs.

- Securely store and maintain data for 2+ years.

- Share data with your trading partners and control what you share and with whom.

- Quickly access your electronic sortable spreadsheet and instantly traceback and traceforward.

Make it easy for suppliers to work with you

- Increase supplier engagement by providing an easy-to-adopt solution.

- Enable suppliers to share KDEs with you via the method that fits their operations.

- Leverage an easy-to-use interface and built-in tools to facilitate data sharing, collaboration, and communication with trading partners.

- Receive technical and communications support to ensure a seamless onboarding experience for suppliers.

Quickly understand and manage compliance across your enterprise and supplier network

- Leverage a compliance dashboard to monitor your data for compliance with FSMA 204 requirements.

- Gain an instant overview of your supplier network and verify compliance with your requirements.

- Confidently confirm traceability compliance with FSMA 204 requirements by quickly viewing which suppliers are fully, partially, or not at all compliant.

- Easily identify orders with missing KDEs to outline a plan for improvement.

iFoodDS offers connected Traceability, Quality, and Food Safety solutions that make it easier to deliver wholesome, fresh, high-quality produce to consumers. With iFoodDS, you'll have the tools you need to transform your food safety processes, gain real-time visibility across your operations, and proactively assess and manage risks.
