

Trace Exchange™ Enterprise

FSMA 204 Readiness For Your Entire Supply Chain

One platform to capture and share data, manage traceability, and prepare for FSMA 204.

Your FSMA 204 compliance depends on every one of your suppliers capturing and sharing KDEs accurately, on time, and in a standardized format.

Trace Exchange is the most flexible and reliable solution for distributors, retailers, and foodservice operators—helping your entire supply chain achieve compliance.

- ✓ **Collect and Share All Your Traceability Data**
Capture KDEs from all your suppliers and share shipping events with all your customers.
- ✓ **Have Confidence in Your Suppliers' Readiness**
iFoodDS educates suppliers on the food traceability list, KDEs, and FSMA 204 requirements.
- ✓ **Gain Traceback and Forward Visibility**
Get a complete picture of your supply chain, and respond to recalls faster, protecting your brand.

What Sets Trace Exchange Apart

Verified Supplier Readiness

Suppliers put traceability into action through the TraceApproved™ program.

Flexible Data Capture and Sharing

Share data with all your trading partners—suppliers and customers.

Backed by Industry Experts

Designed and supported by leading FSMA 204 specialists.

Tackle FSMA 204 Requirements Without Disrupting Operations

- **Integrate with Existing Workflows:**
Connect with solutions you already use to streamline data capture and sharing.
- **Instantly Generate Compliance Reports:**
Generate FDA-required electronic sortable spreadsheets in seconds.
- **Securely Store Required Data:**
Store CTEs, KDEs, and master data essential for FSMA 204 compliance.
- **Access Real-Time Analytics:**
Monitor data accuracy and track progress toward compliance.

Operate with confidence, knowing your suppliers are verified as ready for FSMA 204.

Traceability Readiness for Suppliers

When your suppliers join Trace Exchange, they get access to our self-guided, traceability readiness program that takes them through real-world activities and assignments that put traceability into action.

- ✓ **Eliminate Confusion About FSMA 204**
Educate suppliers on the food traceability list, KDEs, and their responsibilities under FSMA 204.
- ✓ **Gain Confidence in Your Suppliers' Readiness**
When suppliers earn a TraceApproved™ badge, you'll know they're verified as FSMA 204 ready.
- ✓ **Get Access to Industry Experts**
The TraceApproved™ program is designed and supported by leading FSMA 204 specialists.

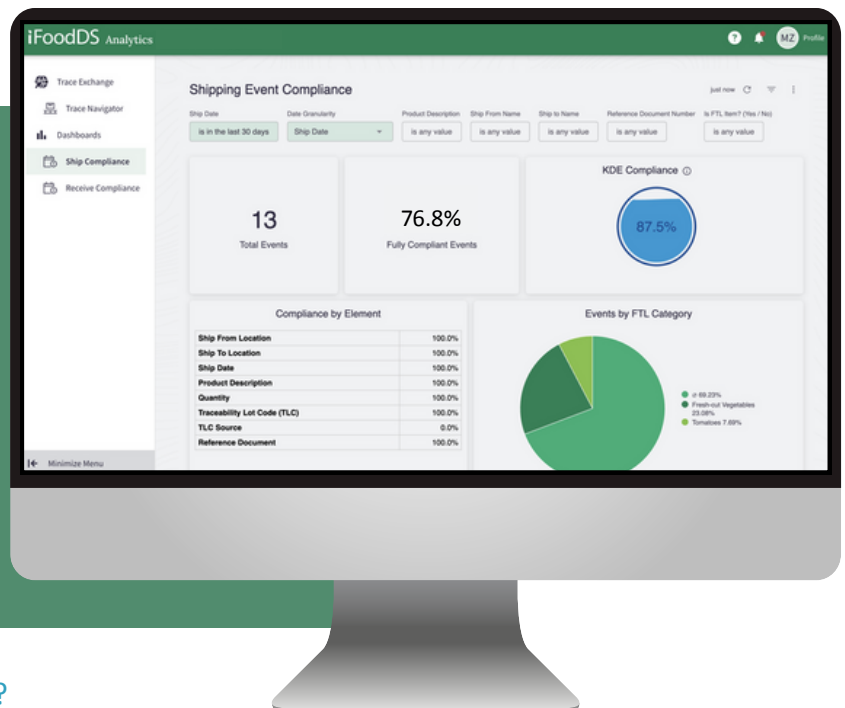

Make it Easy for Suppliers to Work with You

It's easier to get suppliers on board with supply chain traceability solutions when implementation is easy and the solution offers benefits to everyone involved.

- **Unmatched Onboarding Experience:** Our easy-to-adopt solution and expert support team increases supplier engagement.
- **Free Practical Learning:** Our TraceApproved™ program covers FSMA 204 essentials, labeling, and data management.
- **Verified Compliance:** The TraceApproved™ badge signals compliance readiness and helps suppliers win more business.
- **Works with Current Systems:** Suppliers can capture and share KDEs using the method that fits both their operations and your requirements.

Your Path To Compliance

- 1** Invite Suppliers to Join Trace Exchange
iFoodDS assists with outreach, and suppliers start sending you their data.
- 2** Connect with All Your Customers
Share your shipping data with all of your trading partners.
- 3** Keep an Eye on Real-Time Analytics
Easily identify gaps and track supplier performance while you focus on your own compliance.
